Read the following list of jobs and fill in work carefully. If you are now working or have ever worked at any job listed below, write the number of years you worked in that job in the box in front of the name of the job. For example, if you have worked 6 years as an electrician, write the number of years as: [6 yrs.] 321 Electrician. If you have worked less than 1 year, write the number of months as: [3 mos.] 321 Electrician. If you have completed training for any work, but have not yet had a job in it, write just a "T" in the box. If you have worked at more than one job on the list, write the number of years or months in front of each. (This list does not cover all kinds of work. Perhaps you will find something to mark on it. But notice that some of the names on the list cover jobs which often go by other names; for example, a railroad fireman would mark "Fireman.") If this list does not include any or all of the jobs or fields of work in which you have had experience or training, enter in Item 25 below any others that you did not describe on page 2.

NOTE: All you are now working at one of the jobs for which you enter a number in box A, B, C, or D, check the box in which you enter the number of this job.

Re: File No. A 13-13(660a)  
Attention: MR. J.M. FLUKE

Gentlemen:

This is in reply to your letter of June 8, 1945, requesting clarification of several points concerning the theory of our suggested method for voice transmission over a beam of light.

We have made a number of fundamental experiments, proving to our complete satisfaction, the practicability of our system. As stated in our original letter to you dated March 19, 1945, we have been unable to fabricate a model of this system, due to our inability to secure necessary laboratory and model making equipment. With Navy Dept. sponsorship, we will be able to proceed at once, with the development of this model.

The experiments referred to in the above paragraph, and our analysis, centered about a determination of the modulation index obtainable with an audio power input of approximately 10 watts. As a result of these experiments, we have concluded that it will be possible to secure a modulation index of 2 or greater. Our unique drives, plus the use of the finest possible gratings will insure a substantial frequency deviation from the carrier.

Regarding your observations concerning frequency shifts of light-transmitted signals, we believe noise from this source will be relatively negligible. These shifts, to be significant, would have to be of the order of magnitude of the deviation produced by the audio signals, and with the modulation index contemplated, this does not seem likely to be a serious problem.

660

7020336

A 13-3-(3)

In conclusion, we wish to emphasize our sincere desire as citizens and experienced, graduate engineers, to devote our energy to the successful completion of this project, which we are sure will give our country a valuable war weapon.

Very truly yours,

*Alfred Sarant*

Dear Paul,

Your letter was a delight to read so full of happiness and good clear insight. I even smiled indulgently over it. Am glad you are in good shape and that Jerry is going up so nicely. (How you missed my paper yet for hell?)

By all means add the finishing touch to Al's moral and tail by presenting him with a classic tome calculated to keep him occupied for the next twenty years. I can recommend no better candidate for such an honor than

P. A. M. Dirac - "The Principles of Quantum Mechanics" - Oxford University Press - 1935 and

(about \$6.50)

Best comment place to get it from is University Book Export Co.

45 East 17th St.

New York 3, N.Y.

(They give about 15% discount)

A smaller but charming volume is

A. Einstein - "The Meaning of Relativity" - Princeton University Press - 1925.

If I can do anything about the jury duty let me know, sounds like a plot by

Carlo.

Hope you're in town & looking well.

Dear folks,

Letter received with all thanks in good order also letter will

About meeting this summer I see the thought of carrying a canoe  
appeals to me. That would you say, however, to taking a cabin or two  
by the shore of one Minnesota or other, not canoe available for  
short excursions into the hinterland? A fixed base of operations, say on  
some State park or other, can make things right comfortable, particularly  
at night. Let me hear from you further on this most subject, as  
to who, when, who, what. I can take a two week vacation, I think,  
just when I can't say yet. What's Macky doing for a vacation?

Life is the usual humdrum of here. We are surrounded  
pleasantly all around me. They say it will in be over that  
will be nice.

What do you think of my new literary life as outlined in the  
previous paragraph? It is intended to be Woodlandling.

grateful for your ~~kind offer~~ <sup>interest in</sup> ~~the~~ <sup>the</sup> matter. Thanks to you and all.

We are studying German from a grammar now. It is called A New  
German Grammar and the English part are very good.

otherwise all is strictly in a rut as to speak.

Thanks again,

Dear Al,

Thanks for the check. It came in mighty handy inasmuch as I happened to be in need of some petty cash at the moment. Enclosed is what I hope is an iron clad bill of sale for my few sticks and stones of course thanks for the use of them, that's why you got them so cheaply. Has you heard from Helene? Do for all quiet here. Enough of this earthly discourse.

I'm taking quantum mech. under H.A. Kramer (pupil of Bohr, chairman of SciPhi committee, Un. Nat. Adv. E. Comm). Looks like a wonderful course also some Physics under Rabi, General Physiology under Lily Wecht (the name of this is What is Life?), Partial diff. eq. under Kopylov, and a lab. physics course in which I'll do mainly optics experiments. I shall <sup>please</sup> ~~do~~ much work this term.

How's by you? Write and tell all. Love to Puss and regards to Mr. & Mrs. Rose.

Your unworthy colleague,  
Deli

P.S. I just noticed a magazine article that the first use of a magnifying glass to read microfilm was in 1867.

P.S. Enclosed is a letter. I also has one for Spago. How shall I send it? Also send about number (for Lee). Also send a letter. Do you want this stuff?

Sept 25, 1945

Dear Puss & Al,

Hope you're settled & living in the style that one would  
like to be accustomed to. Enclosed are some things that came  
for you. Let us hope they are worth the nail of the higher judge  
that may be required on this letter. A telephone bill also came which  
I plan to take care of as a devotional indication in small part of my  
appreciation in being allowed invited to be your guest in your N.Y.  
residence. Amen. (Louded still quiescent as regards me).

I heard & saw Pete at the Phy. M. meeting. He's hot stuff all  
right.

If you write to Fargo will you inform her that she  
left her pictures (Photograph) & sketch book (with the letter Puss's) up here?  
What's cooking up there? Regards to Mrs. Rose.

Yours,  
Bill
